

Clear displayed alert statistics

Fluorine+

On the Observer Monitor page, you can clear the alert statistics that are currently displayed. **NOTE:** Doing this will remove all data that has been aggregated for alert statistics on the [Monitor](#) page only. Your trend group charts on the [Overview](#) page will not be affected.

Procedure

 This action **cannot be undone**.

To clear the alert statistics displayed as a bar graph on the Monitor page, follow these steps:

1. [Log into Observer](#) and click  > **Monitor** to navigate to the [Monitor](#) page.
2. Scroll down to **Alert Lists** and click  to expand the list of alerts that have been posted for each alert category.
3. On the right-hand side of the page above each alert category list, you will see a  icon. Click this icon to delete all alert list data for an alert category. A popup confirmation will appear, and the page will automatically be refreshed.
