

View business rules before a dynamic share runs

Fluorine+

Before a [dynamic share](#) runs, you may want to view any business rules that might have an impact on the dynamic share actions that occur (inserts, updates, and/or deletes). Oftentimes, the business rules that run before a dynamic share is executed may have an impact on the order of dynamic share execution.

Prerequisites

⚠ First, you will need to follow the steps to [get started with Replicator](#) and create a dynamic share.

Procedure

To view the business rules that will run before dynamic sharing records, follow these steps:

1

Log into your sharing ServiceNow instance and navigate to **Perspectium > Replicator > Dynamic Share**.

2

Click the name of the dynamic share you want to view business rules for.

3

At the bottom of the dynamic share form under **Related Links**, click **View Business Rules Before This Share**. You will automatically be redirected to a list of **Business Rules** that will run before dynamic share actions occur.

The screenshot displays the ServiceNow interface for configuring a dynamic share. The left sidebar shows the navigation menu with 'Perspectium' and 'Replicator' expanded, leading to 'Dynamic Share'. The main content area shows the 'Replicator Configuration' page for a specific dynamic share. The 'Business Rule' tab is selected, showing various settings. The 'Related Links' section at the bottom contains several links, with 'View Business Rules Before This Share' highlighted by a red box and a red arrow pointing to it. The arrow is accompanied by the text 'Click to view business rules that will ! dynamic share actions occur'.
