

Share only selected fields

Fluorine+

To [dynamic share](#) only certain fields when your dynamic share is triggered, you can enable the **Share only selected fields** option under the **Filter and Enrichment** tab. Enabling this feature can be useful when you don't want to or don't have permission to [create a view name](#).

NOTE: Alternatively, you can enable the sharing of selected fields only for ALL ServiceNow dynamic shares in your instance by navigating to **Perspectium > Replicator > Properties** and checking the **Share fields that belong to the selected table only** option.

Prerequisites

 First, you will need to [create a dynamic share](#).

Procedure

To dynamic share only the fields that you specify, follow these steps:

1

Access your dynamic share

Log into your sharing ServiceNow instance and navigate to **Perspectium > Replicator > Dynamic Share**. Then, click into the dynamic share that you want to choose fields to share for.

2

Check Share only selected fields

Click the **Filter and Enrichment** tab. Then, check the **Share only selected fields** box.

3

Choose fields to dynamic share

Scroll down near the bottom of the form underneath the Related Links. Click the **Share Fields** tab. Then, click **New**. If using Google Chrome, a popup may appear indicating that you are leaving the form. If this popup appears, click **Leave**.

Choose the fields that you want to dynamic share out from the **Field** dropdown. Finally, click **Submit**.

4

Click Update

Near the bottom left-hand corner of the form (just above **Related Links**), click **Update** to save the changes to your dynamic share.
