

Cancel a bulk share

Fluorine+

When a [bulk share](#) that defines a large data set is currently scheduled and running, you may want to cancel the bulk share to modify the query or configure additional options. Canceling a bulk share with a status of **Scheduled** or **Running** stops the bulk share's running jobs and changes the bulk share's status to **Canceling** > **Canceled**.

Prerequisites

 First, you will need to follow the steps to [get started with Replicator](#) and [create a bulk share](#).

Procedure

To cancel a bulk share that is scheduled or running, follow these steps:

1

Log into your sharing ServiceNow instance and navigate to **Perspectium > Replicator > Bulk Share**.

2

Click into the scheduled or running bulk share that you want to cancel.

3

Scroll to the bottom left-hand corner of the form and click **Cancel** under **Related Links**. Your bulk share's status will be changed to **Canceling** and then **Canceled**.
