

Clone bulk share

Fluorine+

Bulk share configurations can easily be cloned clicking the **Clone bulk share** link under the **Related Links** section of the bulk share form. You can also choose the **Clone and run bulk share** link to create a copy of the bulk share you are viewing and then run that cloned bulk share.

Prerequisites

⚠ First, you will need to follow the steps to [get started with Replicator for ServiceNow](#) and [create a ServiceNow bulk share](#).

Procedure

To clone/clone and run your bulk share configurations, follow these steps:

1

Log into your sharing ServiceNow instance and navigate to **Perspectium > Replicator > Bulk Share** or simply type and then click **Bulk Share** in the Filter Navigator on the upper left-hand side of the screen.

2

Click into the bulk share you want to copy.

3

At the bottom of the bulk share form under **Related Links**, click **Clone bulk share** to create a duplicate of the current bulk share. Or, to clone your bulk share and then immediately execute the newly duplicated bulk share, click **Clone and run bulk share**.

The screenshot shows the ServiceNow interface for a Bulk Share configuration. The left sidebar contains the Filter Navigator with 'Bulk Share' selected. The main form displays various settings for a bulk share named 'bulk share_test_tim pike 01'. At the bottom of the form, under the 'Related Links' section, two links are highlighted with red boxes and arrows: 'Clone bulk share' and 'Clone and run bulk share'. Red text annotations point to these links, stating 'Click to create a copy of this bulk share' for the first link and 'Click to create a copy of this bulk share and run the duplicated bulk share' for the second link. The 'Clone and run bulk share' link is also highlighted with a red box.
