

Run a bulk share as another user

Fluorine+

By default, bulk shares are scheduled jobs that are run as the **system user** with access to all the records of a table. However, you can alternatively run your bulk share as another user by utilizing the **Run as** option. This feature can be useful when you want to limit the bulk share to a subset of data that certain users have access to, such as records in one domain in your [domain separated instance](#).

Prerequisites

⚠ First, you will need to follow the steps to [get started with Replicator](#) and [create a bulk share](#).

Procedure

To run a bulk share as another user, follow these steps:

1

Log into your sharing ServiceNow instance and navigate to **Perspectium > Replicator > Bulk Share** or simply type and then click **Bulk Share** in the Filter Navigator on the upper left-hand side of the screen.

2

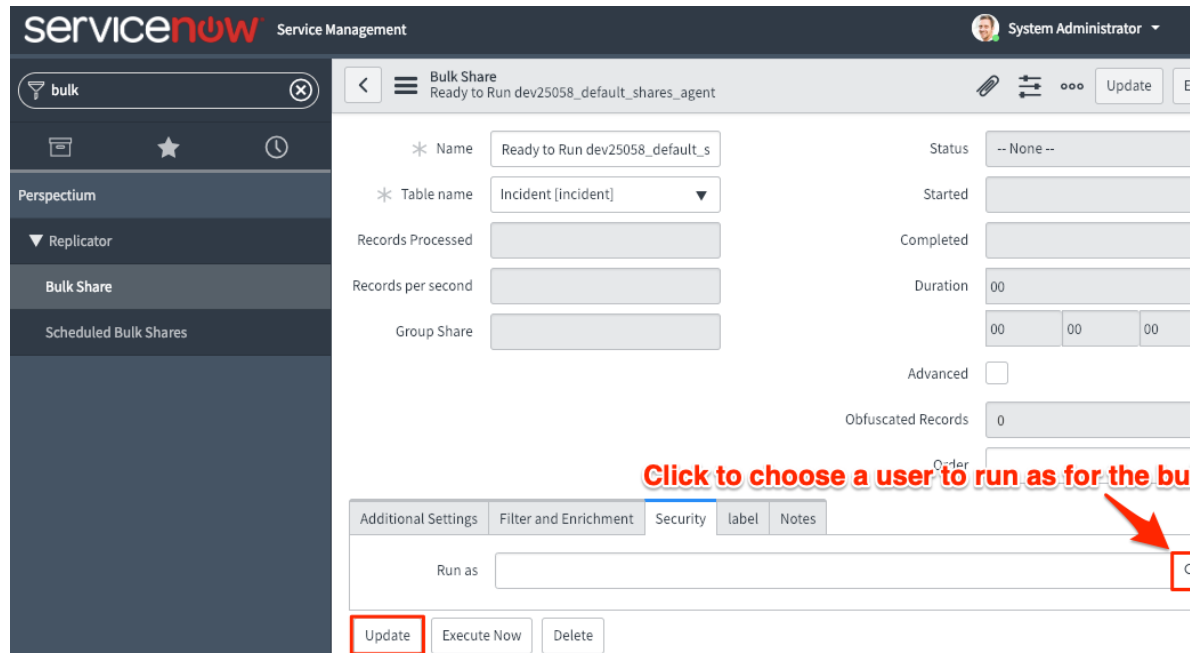

Click the timestamp next to the name of the bulk share you want to run as another user for.

3

Scroll down to and click the **Security** tab. Then, click the  icon and choose a user to run as for your bulk share.

4

In the bottom left-hand corner of the form, click **Update** to save your changes.

The screenshot shows the ServiceNow interface for a Bulk Share. The left sidebar has a filter 'bulk' and a navigation menu with 'Perspectium', 'Replicator', 'Bulk Share', and 'Scheduled Bulk Shares'. The main form is titled 'Bulk Share' and 'Ready to Run dev25058_default_shares_agent'. It has several fields: 'Name' (Ready to Run dev25058_default_s), 'Table name' (Incident [incident]), 'Records Processed', 'Records per second', 'Group Share', 'Status' (None), 'Started', 'Completed', 'Duration' (00:00:00), 'Advanced' (checkbox), and 'Obfuscated Records' (0). At the bottom, there are tabs for 'Additional Settings', 'Filter and Enrichment', 'Security', 'label', and 'Notes'. The 'Security' tab is active, showing a 'Run as' field with a search icon. A red arrow points to the search icon with the text 'Click to choose a user to run as for the bu'. Below the 'Run as' field are buttons for 'Update', 'Execute Now', and 'Delete'.
