

# Create a new group share

Fluorine+

## Prerequisites

⚠ First, [install the Perspectium core update set for ServiceNow](#).

## Procedure

To create a new group share, follow these steps:

1. Log into your ServiceNow instance and navigate to **Perspectium > Group Share > Create New** or simply type **Group Share** and then click **Create New**.
2. Type any name for your group share.
3. Under **Target Queue**, click the  icon to pull up your shared queues. Then, choose a queue from the list to group share your data to.
4. Choose the **Target** you want to share to from the Target dropdown. Options include:
  - **ServiceNow**: Share records to another ServiceNow instance
  - **ServiceBond**: Share records to an application instance other than ServiceNow
4. Choose your [encryption/decryption](#) method from the **Encryption Method** dropdown.
5. To enable [table compare](#) functionality, check the **Table Compare** box. Otherwise, continue to **Step 6**.
6. To enable [bulk sharing](#) to another ServiceNow instance, check the **Bulk Share** box. The **Run** dropdown will then appear with the following options for timeframes to run the bulk shares within your group share:

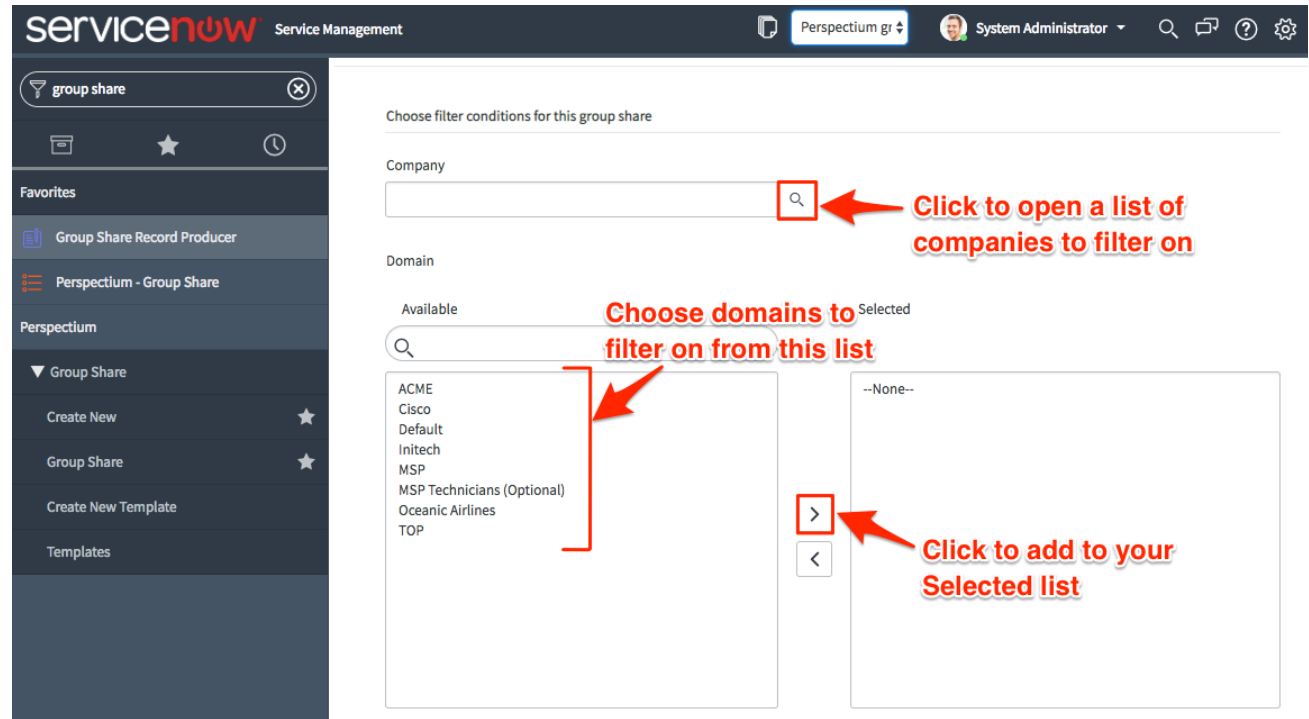

Timeframe	Run your bulk shares...	Options
On Demand	immediately	N/A
Periodically	at specified intervals	<ul style="list-style-type: none"><li>• <b>Repeat Interval</b>: Indicate how frequently to run the bulk shares for your group share<ul style="list-style-type: none"><li>◦ Type a number next to <b>days</b> to run your bulk shares <b>every x days</b>.</li><li>◦ Next to <b>hours</b>, type the time intervals (<b>every x hours, minutes, and seconds</b>) to run your bulk shares for</li></ul></li><li>• <b>Starting</b>: Choose a date and time to start running the periodic bulk shares for your group share 📘 <b>For example</b>, typing 3 next to <b>Days</b> will run your bulk shares every 3 days, or typing 04:15:00 next to <b>Hours</b> will run your bulk shares every 4 hours and 15 minutes.</li></ul>
Monthly	once per month	<ul style="list-style-type: none"><li>• <b>Day</b>: Choose a day of the month to run the bulk shares in your group share</li></ul>
Weekly	once per week	<ul style="list-style-type: none"><li>• <b>Day</b>: Choose a day of the week to run the bulk shares in your group share</li></ul>
Daily	once per day	<ul style="list-style-type: none"><li>• <b>Starting</b>: Choose a date and type a time to run the bulk shares in your group share every 24 hours</li></ul>
Once	once at a specified date and time	<ul style="list-style-type: none"><li>• <b>Starting</b>: Choose a date and type a time to run the bulk shares in your group share</li></ul>

7. To enable [dynamic sharing](#) to another ServiceNow instance, check the **Dynamic Share** box. Then, check the **Dynamic Share Active** box so that the dynamic share will be active and records will start sharing out as they are created/updated/deleted.

8. To share out records for only one company, click the  icon under **Conditions > Company**. Then, choose a company from the list that you want to filter your group share by.

9. To share out records for only certain domains, choose the domains you want to filter on from the list under **Available**. Then, use the  button to add the domains you want to filter by to the **Selected** list.

**NOTE:** Domain filtering options will only appear if your ServiceNow instance is [domain-separated](#).

The screenshot shows the ServiceNow interface for configuring a group share. The left sidebar contains a navigation menu with options like 'Group Share Record Producer', 'Perspectium - Group Share', and 'Group Share'. The main area is titled 'Choose filter conditions for this group share'. It has two sections: 'Company' and 'Domain'. The 'Company' section has a search bar with a magnifying glass icon. The 'Domain' section has two lists: 'Available' and 'Selected'. The 'Available' list contains items like 'ACME', 'Cisco', 'Default', 'Initech', 'MSP', 'MSP Technicians (Optional)', 'Oceanic Airlines', and 'TOP'. The 'Selected' list is currently empty and labeled '--None--'. There are red annotations with arrows pointing to the magnifying glass icon in the 'Company' section, the 'Available' list, and the right arrow button between the 'Available' and 'Selected' lists.

Choose domains to filter on from this list

Click to open a list of companies to filter on

Click to add to your Selected list

10. To use a [template of tables](#) to group share your data from, select a template from the **Templates** dropdown. Otherwise, select the tables you want to group share from the **Available** list and use the  button to add the tables to the **Selected** list.

**NOTE:** By default, you can add a maximum of 100 tables to your **Selected** list. To use the [CMDB Analytics PSP Template](#) for your group share, you will need to enable the Selected list to allow for more tables to be added. To do this, follow the steps to [change the number of items visible in ServiceNow related lists](#) to 3000.
