Clear displayed alert statistics

<div style="background: #2ecc8f; color: white; padding: 20px; display: inline-block;">**Fluorine+**</div>

On the Observer Monitor page, you can clear the alert statistics that are currently displayed. <u>**NOTE:**</u> Doing this will remove all data that has been aggregated for alert statistics on the **Monitor** page only. Your trend group charts on the **Overview** page will not be affected.

Procedure

⚠ This action **cannot be undone**.

To clear the alert statistics displayed as a bar graph on the Monitor page, follow these steps:

1. Log into Observer and click [≡] > **Monitor** to navigate to the **Monitor** page.

2. Scroll down to **Alert Lists** and click [▲] to expand the list of alerts that have been posted for each alert category.

3. On the right-hand side of the page above each alert category list, you will see a [⌫] icon. Click this icon to delete all alert list data for an alert category. A popup confirmation will appear, and the page will automatically be refreshed.
