

Alert before bulk sharing a large number of records

Fluorine+

In Replicator Properties, the option to **alert me before bulk sharing a large number of records** will enable an alert to pop-up within your instance whenever a ServiceNow bulk share that you're trying to execute exceeds a minimum number of records.

NOTE: The functionality to be alerted when sharing 1,000,000 or more records in a ServiceNow bulk share is enabled by default.

Prerequisites

⚠ First, you will need to [install Replicator for ServiceNow](#) and [run the Perspectium Finish Install scripts](#).

Procedure

To be alerted whenever you try to run a bulk share for a minimum number of records, follow these steps:

1

Access Replicator Properties

Log into your sharing ServiceNow instance and navigate to **Perspectium > Replicator > Properties**.

2

Enable alerts for bulk sharing a minimum number of records

Check the box labeled **Alert me before bulk sharing a large number of records**. Then, enter the minimum number of records being bulk shared that will trigger this alert in the field labeled **Minimum number of records to trigger an alert before bulk sharing**. Finally, scroll down to the bottom of the page and click **Save** to save your changes.

The screenshot shows the ServiceNow Service Management interface. The left sidebar contains a search bar with 'replicator' and a list of navigation items: Perspectium, Replicator (expanded), Homepage, Properties, Ready to Run, Data Obfuscation Dashboard, Dynamic Share, Bulk Share, Subscribe, Subscribed Queues, Shared Queues, and Scheduled Bulk Shares. The main content area displays the 'Properties' page for the 'replicator'. It includes a search bar, a list of fields, and a section for 'Alert me before bulk sharing a large number of records'. This section has a checkbox that is checked, with a red arrow pointing to it and the text 'Check to enable alerts for large bulk shares'. Below this is a text input field labeled 'Minimum number of records to trigger an alert before bulk sharing' with the value '1000000' entered, also with a red arrow pointing to it and the text 'Enter minimum records in a bulk share to trigger these alerts'.
