

Access your Consumer Key and Consumer Secret

Fluorine+

A connected app integrates an application using Salesforce APIs. Connected apps use standard SAML and OAuth protocols to authenticate, provide single sign-on, and provide tokens for use with Salesforce APIs. In addition to standard OAuth capabilities, connected apps allow administrators to set security policies and have explicit control over who may use the corresponding applications.

Perspectium Replicator is a connected app when used in non-production organizations because it uses Salesforce APIs to generate Dynamic Share Apex Triggers. The Salesforce APIs is an OAuth protected service that defines the OAuth scopes and callback URL for the Perspectium Replicator connected app. The connected app configuration provides an OAuth Consumer Key and a Consumer Secret used for authorization.

Prerequisites

⚠ First, you will need to [install the Perspectium Package for Salesforce](#).

⚠ You will also need to [configure your Salesforce remote site settings](#).

Procedure

As of the Perspectium [Europium release](#), you can view your **Consumer Key** and **Consumer Secret** within the **Salesforce Lightning UI** by following these steps

1

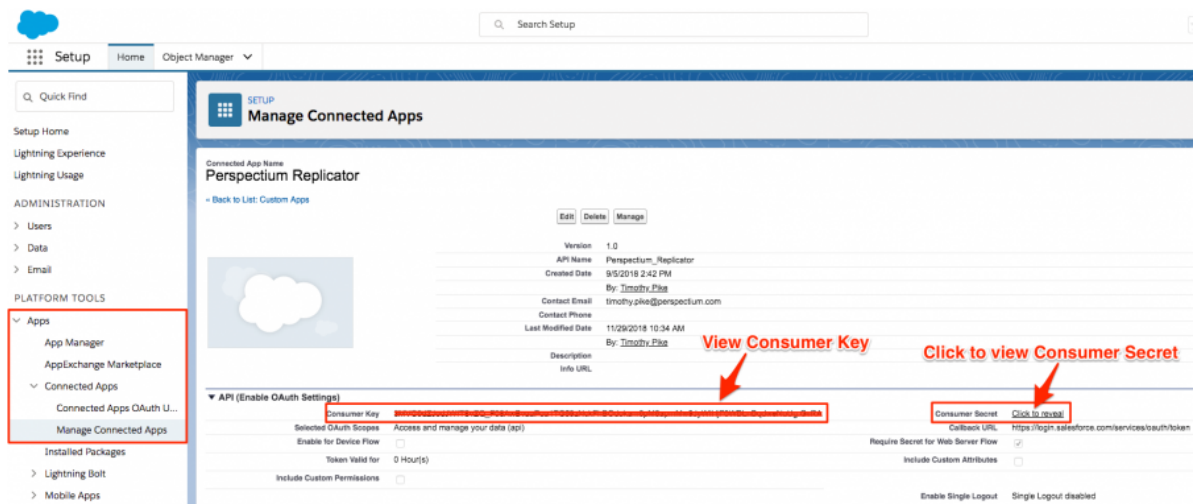

Log into your Salesforce organization and click the  icon in the top right-hand corner of the screen. Then, click **Setup**.

2

In the Quick Find window on the left side of the screen, type and then click **App Manager** (under **Apps**). Then, search for the **Perspectium Replicator** app in the list and click the corresponding dropdown arrow at the far right of the screen and click **View** from this dropdown.

3

Your **Consumer Key** will be listed under the **API (Enable OAuth Settings)** section. Within this same section, click **Click to reveal** next to **Consumer Secret** to view your Consumer Secret.

The screenshot shows the Salesforce Lightning UI for the 'Manage Connected Apps' page. The 'Perspectium Replicator' app is selected. The 'API (Enable OAuth Settings)' section is expanded, showing the 'Consumer Key' and 'Consumer Secret'. The 'Consumer Key' is highlighted with a red box and labeled 'View Consumer Key'. The 'Consumer Secret' is highlighted with a red box and labeled 'Click to view Consumer Secret'.
