

Run Perspectium Finish Install scripts

Gold

After committing any Perspectium update sets to your ServiceNow instance, the **Finish Install** scripts must be run in order for your Perspectium applications to function correctly. Finish Install will check if the Perspectium application is in the global scope, run jobs to install properties for the application, start running scheduled jobs, and reset dynamic share rules. By running the Finish Install script, you will not overwrite your current Perspectium properties.

NOTE: You should run the Finish Install script if you are [installing DataSync for ServiceNow for the first time](#) or [upgrading your DataSync for ServiceNow version](#). The Finish Install scripts can also be run after committing multiple Perspectium [update sets](#) for ServiceNow.

Procedure

To run the Finish Install scripts, follow these steps:

1

Log into ServiceNow

Log into your sharing ServiceNow instance and navigate to **Perspectium > Control and Configuration > Finish Install**.

2

Run the Finish Install scripts

At the bottom of the form, click **Confirm** to start running the Finish Install scripts.

The screenshot shows the ServiceNow interface. On the left is a navigation menu with the following items: control and configuration, Perspectium, Control and Configuration, Finish Install (highlighted), Properties, Error Notification, Start All Jobs, Stop All Jobs, Status, and Test Connection. The main content area is titled 'Perspectium - Confirm Action' and 'Finish Install'. It contains the following text: 'Clicking Confirm below will complete your installation of the Perspectium Update Sets for this instance.' Below this, under 'What will be done', are three bullet points: 'Perspectium Properties will be initialized.', 'Validation tests will be run.', and 'Perspectium Jobs will start running.' Under 'When to run Finish Install', there are two bullet points: 'Run as a final step after committing multiple Perspectium Update Sets.' and 'Run as a final step for first-time installation and for any Perspectium Update Set version upgrades.' At the bottom right, there are two buttons: 'GO BACK' and 'CONFIRM'. The 'CONFIRM' button is highlighted with a red box, and a red arrow points to it with the text 'Click to run Finish Install scripts'.
