

Collapse the y-axis for a trend group chart

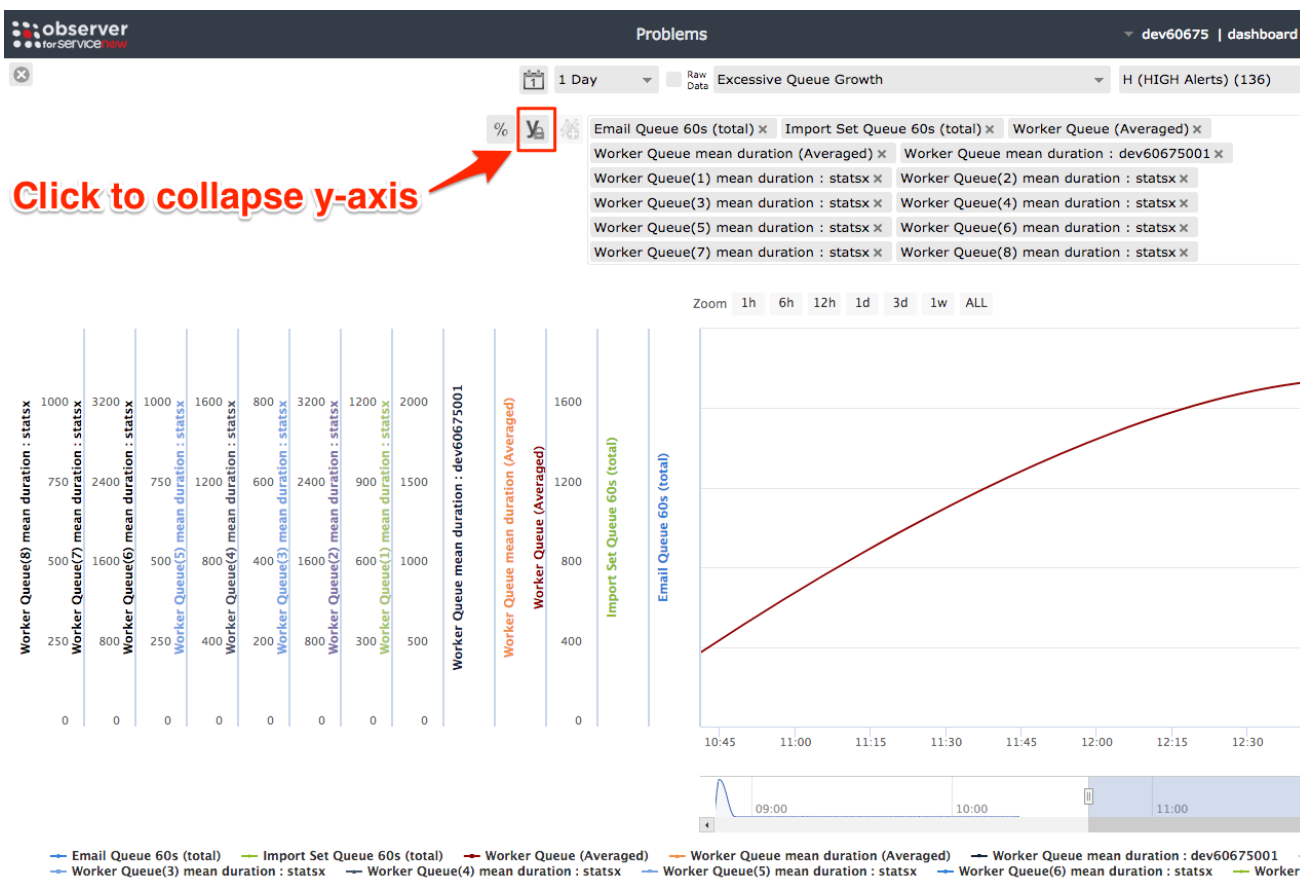

Gold

On the Observer Problems page, the y-axis for trend group charts can often become very large, pushing the actual chart out of view. When this happens, you can easily collapse the y-axis to make the trend group chart easier to view.

Procedure

To collapse the y-axis for a trend group chart, follow these steps:

1. Log into Observer and click  > **Problems** to navigate to the **Problems** page.
2. Select the trend group you want to display from the dropdown at the top of the page next to "Raw Data".
3. Click the  icon. The y-axis for the trend group chart will then be collapsed.
