

# Display trend group data as a percent of the y-axis

Gold

## Procedure

To display trend group data as a percent of the y-axis, follow these steps:

1. Log into Observer and click  > **Problems** to navigate to the **Problems** page.
2. Select the trend group you want to display from the dropdown at the top of the page next to "Raw Data".
3. Click the  icon. The y-axis for the trend group chart will then be rendered to display percentages of each metric's maximum value in the chart's data range. For example, data for **SQL selects (Averaged)** will be displayed as that metric's value as a percentage of the maximum **SQL selects (Averaged)** value in the chart's data range.
