

Access Observer

Gold

Observer is made up of two components, the ServiceNow application that pushes data to the **Perspectium Integration Mesh** and the user interface (**Observer UI**) that sits in the **Integration Mesh** for you to see real time data collection and analytics of your instance.

You can start using **Observer** by [configuring](#) the ServiceNow application and/or using the **Observer UI**.

To access the **Observer UI** from your ServiceNow instance, in the top left-hand navigation window type **Observer UI**. Then, click the **Observer UI** module that appears underneath the navigation window. If you're not automatically redirected to Observer in a separate browser tab, check your browser's settings to make sure that you are **allowing popups** from [ServiceNow.com](https://servicenow.com).

[blocked URL](#) **NOTE:** To easily access Observer later, click the  icon to save **Observer UI** to your ServiceNow favorites.
