

Reset Bulk Share for DataSync Free

Gold

Once a bulk share has been executed, the bulk share form fields will become read only. If you want to modify your bulk share again before executing another share, you can execute **Reset Bulk Share** in the bulk share form.

Prerequisites

[blocked URL](#) First, you will need to follow the steps to [get started with DataSync Free](#) and [create a bulk share](#).

Procedure

To reset your bulk share, follow these steps:

1

Navigate to Bulk Share

Log into your sharing ServiceNow instance and navigate to **Perspectium DataSync Free > DataSync Free > Bulk Share**. Click into the bulk share you want to modify.

2

Click Reset Bulk Share

Navigate to the bottom of the form towards the Related Links. Then, click **Reset Bulk Share**.
