Growth Report

Growth Report displays a visual representation of previously generated Estimate to show how table record counts grew over time. You will have the option to select previous reports, as well as customize how the reports are shown.

Prerequisites

Lestimate tables in your ServiceNow instance

Procedure

To see your Growth Report, follow these steps:

View growth report

After you click View Growth Report from the Estimate module, you will automatically be redirected to the Growth Report module.

1 NOTE: A View Previous Growth Report related link will appear in the Estimate module if there are previously created Growth Reports.

Then, under the Related Links, click View Previous Growth Report.

perspectium

Estimate

Estimate the number of records in a table and see their growth over time

Table (i)		Group By 🛈		Conditions (j)		
None	~	None	~	Conditions		
unning an estimate report aga	inst tables with large vo	lumes of records may impact perform	nance		Add Row	Delete Last F
eation Date Range (Optional) 🛈)					
FROM	🕮 - ТО	æ				
			Run			

Select a report

Select a previously generated record estimate in the **Estimation** dropdown. If you navigated here from **View Growth Report**, the previously ran estimation will be automatically selected and displayed.

3

Select how you want to see your report

Select how you want to see your report by selecting the **Trend type**, **Growth Interval** and **Graph Type**. Additionally, enable **Show Group By** if you want the report to display data grouped as in the estimation report you selected in the **Estimation** dropdown. You can also enable **Show Detailed Grid** to include a data grid to the report.
