| Meshlets with DataSync Release Notes  |
| DataSync Known Issues                 |

## Release Names and Packaging

The releases name are in the format of **<Major>.<Minor/Patch>.<Hotfix>**. The contents of a release package are based on the name and are as follows:

| Format       | Description                                                                                                                                                                                                                                                                                                                                       |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Major        | <p>Version of the software that contains significant new features, enhancements, and/or improvements in the user interface (UI) or user experience (UX).</p> <p>Perspectium's release name follows the chemical elements (e.g. Helium) and are released alphabetically. For example, <b>Helium 6.0.0</b> is the major release following Gold.</p> |
| Minor /Patch | <p>A set of changes that contains updates, bug fixes, and/or improvements on the product. This release version <b>can</b> be installed by itself without a major release.</p> <p>(e.g. <b>Helium 6.1.0</b>)</p>                                                                                                                                   |
| Hotfix       | <p>A set of changes that addresses a specific issue. This release version <b>cannot</b> be installed by itself, it will need to be uploaded on top of a major or patch release. Starting with Helium, hotfixes are cumulative so hotfix 2 will contain fixes in hotfix 1.</p> <p>(e.g. <b>Helium 6.0.1</b> also known as Helium Hotfix 1)</p>     |

## Release Compatibility

Perspectium tests **n-2** compatibility with each release e.g. the previous two major releases of the Agent prior to this release has been tested with the latest version of the ServiceNow application.
