

ServiceBond for Jira

ServiceBond for Jira allows for automated DevOps workflows between ServiceNow and [Jira](#) that are vital to software development efforts. Via Perspectium's [ServiceBond integration framework](#), you can easily set up seamless bi-directional movement of your service requests, incidents, problems, tasks, and much more.

Get started with ServiceBond for Jira

Here's how to get started with your ServiceBond for Jira integration:

1. [Create a Jira webhook](#)
2. [Create a Jira custom field](#)
3. [Create a Jira user](#)
4. [Bond Jira with another app](#)

Additionally, to enhance ServiceBond for Jira, you can configure the Jira [Meshlet](#) to the directives listed on [this page](#).
