

Meshlet Configurations for Jira

To enhance **ServiceBond for Jira**, you can configure the **Jira Meshlet** to the directives listed below:

Directive	Default Value	Description
sessionAuth	true	<p>Indicates whether you want to authenticate your Jira connection with session IDs instead of basic authentication.</p> <p>NOTE: This directive only works with Jira server, thus, you will need to set server to true. (See the next directive).</p> <pre>perspectium: jira: sessionAuth: true</pre> <p>The following example enables the use of session IDs for your connection:</p> <pre>perspectium: jira: server: true sessionAuth: true</pre>
server	true	<p>Enable the use of the Jira server for your Jira connection.</p> <p>NOTE: This directive needs to be enabled in order to use the sessionAuth configuration.</p> <pre>perspectium: jira: server: true</pre>
