DataSync Known Issues

Release Names and Packaging

The releases name are in the format of **<Major>.<Minor/Patch>.<Hotfix>**. The contents of a release package are based on the name and are as follows:

Format	Description
Major	<p>Version of the software that contains significant new features, enhancements, and/or improvements in the user interface (UI) or user experience (UX).</p> <p>Perspectium's release name follows the chemical elements (e.g. Helium) and are released alphabetically. For example, Helium 6.0.0 is the major release following Gold.</p>
Minor /Patch	<p>A set of changes that contains updates, bug fixes, and/or improvements on the product. This release version can be installed by itself without a major release.</p> <p>(e.g. Helium 6.1.0)</p>
Hotfix	<p>A set of changes that addresses a specific issue. This release version cannot be installed by itself, it will need to be uploaded on top of a major or patch release. Starting with Helium, hotfixes are cumulative so hotfix 2 will contain fixes in hotfix 1.</p> <p>(e.g. Helium 6.0.1 also known as Helium Hotfix 1)</p>

Release Compatibility

Perspectium tests **n-2** compatibility with each release e.g. the previous two major releases of the Agent prior to this release has been tested with the latest version of the ServiceNow application.
