

DataSync Express

The **Perspectium DataSync Express Scoped Application** allows your instance to interact with the Perspectium Integration Mesh for seamless data integration with a data store. The DataSync Express application utilizes scheduled jobs and script includes to send messages to the Integration Mesh cloud for a Cloud Database (MariaDB) supported by Perspectium.

For your reference, we've created downloadable user guides to help you install and configure DataSync Express (see below).

You can also find instructions [here](#).

Then, visit [this section](#) for an overview of the app, including its modules and the various actions you can perform in each module.

DataSync Express User Guides

Below are downloadable PDF documents designed to help you install and set the initial configurations for DataSync Express:
