

ServiceBond for Autotask

ServiceBond for Autotask allows for a multidirectional integration to sync [Autotask](#) tickets with other Perspectium-supported ITSM applications via Perspectium's [ServiceBond integration framework](#).

Enterprise IT departments leverage Autotask to marry their ITSM, IT asset management, IT security, endpoint management, and supply chain capabilities using the power of unified IT.

Get started with ServiceBond for Autotask

Here's how to get started with your ServiceBond for Autotask integration:

1. [Create user defined fields](#)
2. [Bond Autotask with another app](#)
