Snapshot Calculator

Use the calculations below to see typical numbers for backing up and restoring a million records.

Numbers are based on **Snapshot** being installed on a standard ServiceNow instance with two nodes. Backups and restores were executed using out of box **Snapshot** settings configured for posting and receiving consistent batch sizes to the Perspectium Integration Mesh.

Backup Calculator

Process	Average Record Size	Records/Sec	Per Million Records	
			Size	Time
Incident	5KB	110	5GB	2h 31m
Configuration Item	2KB	110	2GB	2h 31m
Request	2KB	110	2GB	2h 31m
Change	3KB	110	3GB	2h 31m

Restore Calculator

Process	Average Record Size	Records/Sec	Per Million Records	
			Size	Time
Incident	5KB	90	5GB	3h 5m
Configuration Item	2KB	90	2GB	3h 5m
Request	2KB	90	2GB	3h 5m
Change	3KB	90	3GB	3h 5m
