

ServiceBond for Jira Service Desk

ServiceBond for Jira Service Desk allows you to integrate your [Jira Service Desk](#) (JSD) platform with other ITSM applications via Perspectium's [ServiceBond integration framework](#).

This means you can configure multidirectional sharing to send data in Jira Service Desk, such as incidents, to other Perspectium-supported applications.

Get started with ServiceBond for Jira Service Desk

Here's how to get started with your Jira Service Desk integration:

1. [Set up your JSD instance for ServiceBond](#)
2. [Set up JSD meshlet mappings and configuration file](#)
3. [Bond Jira Service Desk with another app](#)
