

Dashboard Release Notes

Version

6.0.2 6.0.1 6.0.0

NOTE: Dashboard 6.0.2 does not require previous versions (such as 6.0.0) of the Dashboard be installed in your ServiceNow instance as it contains the complete Dashboard feature. Only the latest Helium version of the Perspectium Core application is required.

Release Date: August 4, 2021

Bug Fixes

The "Refresh" and "Properties" icons will no longer disappear when accessing the Dashboard main page.

Enhanced error logging for Integration Mesh (MBS) connection.

NOTE: Dashboard 6.0.1 does not require previous versions (such as 6.0.0) of the Dashboard be installed in your ServiceNow instance as it contains the complete Dashboard feature. Only the latest Helium version of the Perspectium Core application is required.

Release Date: May 25, 2021

Bug Fixes

Removed unused view icon for Dashboard properties.

Fixed issue causing an error message to display on the Dashboard main page when a valid MBS 4.6.12 version is connected but no Agent results were found for a vhost user.

The numbers in the "Total monthly records" field will no longer overflow and can be viewed properly.

Release Date: March 25, 2021

New Features

A visual representation of operational details of your ServiceNow instances and bulk/dynamic shares, open tickets with Perspectium Support, and monitoring existing queues is now available through [Dashboard](#).
