Copy bulk share configurations

Fluorine

Bulk share configurations can easily be duplicated clicking the **Create another bulk share like this one** link under the **Related Links** section of the bulk share form. You can also choose the **Run another bulk share like this** link to create a copy of the bulk share you are viewing and then run that duplicated bulk share.

Prerequisites

⚠ First, you will need to follow the steps to get started with Replicator and create a bulk share.

Procedure

To copy your bulk share configurations, follow these steps:

1 Log into your sharing ServiceNow instance and navigate to **Perspectium** > **Replicator** > **Bulk Share** or simply type and then click **Bulk Share** in the Filter Navigator on the upper left-hand side of the screen.

2 Click the timestamp next to the name of the bulk share you want to copy.

3 At the bottom of the bulk share form under **Related Links**, click **Create a new bulk share like this one**. Alternatively, to copy your bulk share and then immediately execute the newly duplicated bulk share, click **Run another bulk share like this**.
