

Install the Perspectium Package for Salesforce

Fluorine

Perspectium Support can provide you with either an **Unmanaged Package** or **Managed Package** for Salesforce. The Unmanaged Package allows for customization of the package code, while the Managed Package disallows code customizations.

Procedure

To install your Perspectium Package for Salesforce, follow these steps:

1

Request a link for either the Unmanaged Package or Managed Package for Salesforce by contacting Perspectium Support.

2

If installing your Package to a sandbox (testing) instance, first log out of your Salesforce production organization. Then, replace **log in** in the provided link with **test** before navigating to the URL. Otherwise, if installing your Package to a non-sandbox instance, simply click the provided link.

3

Log into Salesforce and then choose to install the Package for **admins only**, **all users**, or **specific profiles**. If choosing to install the Package for specific profiles, choose the profiles you want to grant access for by selecting **Full Access** from the appropriate dropdowns. Finally, click the **Install** button.

The screenshot shows the 'Install Perspectium Replicator' page. At the top, there is a green download icon and the text 'Install Perspectium Replicator By Perspectium'. Below this, a red arrow points to the heading 'Choose an installation option'. There are three options: 'Install for Admins Only' (selected), 'Install for All Users', and 'Install for Specific Profiles...'. A second red arrow points to the 'Install' button at the bottom right of the page. Below the main section, there is a table with details: App Name (Perspectium Replicator), Publisher (Perspectium), Version Name (Europium), and Version Number (1.51 Release Notes). There are also links for 'Additional Details' and 'View Components'.

App Name	Publisher	Version Name	Version Number
Perspectium Replicator	Perspectium	Europium	1.51 Release Notes

4

Once the installer is finished running, click **Done** on the Installation Complete! page to finish installation of the Package.
