

Check Salesforce connectivity to the Perspectium Mesh

Fluorine

With your Salesforce service integration, you can set up a Perspectium Job to monitor messages that are being sent to the Perspectium Mesh cloud.

Prerequisites

⚠ First, you will need to follow the steps to [get started with a Salesforce service integration](#).

Procedure

To create a job that monitors connectivity to the Perspectium Mesh, follow these steps:

1

Log into your Salesforce organization and click the  icon in the upper left-hand corner of the screen. Then, click the **Perspectium Replicator** app.

2

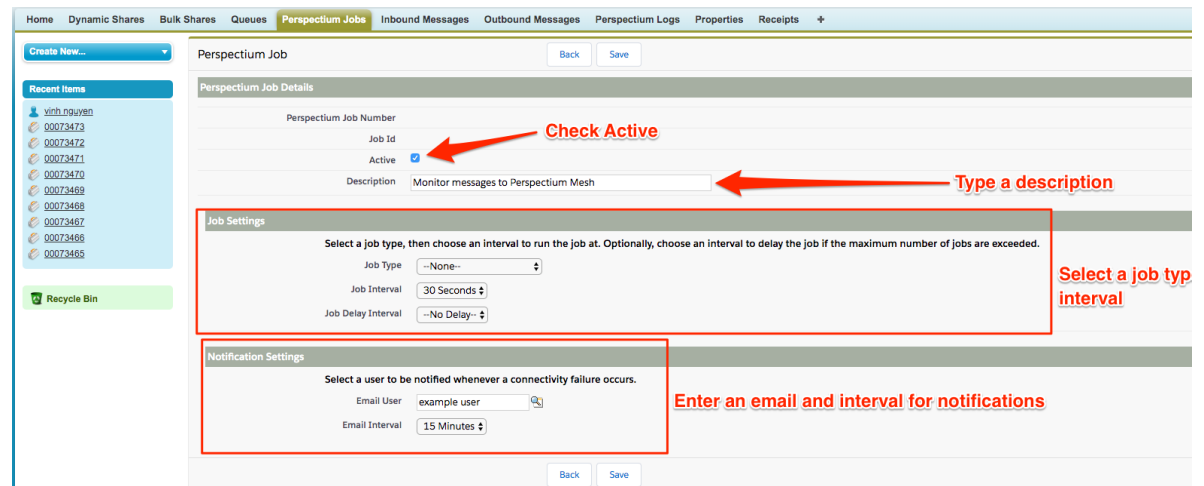

In the navigation bar near the top of the screen, click **Perspectium Jobs**. Then, in the upper left-hand corner of the resulting page, click **New Perspectium Job**.

3

Check the **Active** box and type any description for your job. Then, enter a **Job Type** and **Job Interval**. There are two job types, **MultiOut Processing** for sharing and **Replicator Subscribe** for subscribing.

4

Then, enter an **Email User** and an **Email Interval** that you would like to receive notifications for connectivity failure. Finally, click **Save** at the bottom of the form to save your job settings.

The screenshot shows the 'Perspectium Job' configuration form. The form is divided into several sections: 'Perspectium Job Details', 'Job Settings', and 'Notification Settings'. The 'Perspectium Job Details' section includes fields for 'Perspectium Job Number', 'Job Id', 'Active' (a checkbox), and 'Description'. The 'Job Settings' section includes a dropdown for 'Job Type', and input fields for 'Job Interval' and 'Job Delay Interval'. The 'Notification Settings' section includes a dropdown for 'Email User' and an input field for 'Email Interval'. Red arrows and text boxes provide annotations: 'Check Active' points to the 'Active' checkbox; 'Type a description' points to the 'Description' field; 'Select a job type interval' points to the 'Job Type' dropdown; and 'Enter an email and interval for notifications' points to the 'Email User' and 'Email Interval' fields.
