

SalesInsight

Fluorine

Perspectium SalesInsight is a preconfigured service integration that bonds ITSM applications with Salesforce for insightful sales and account management use cases. SalesInsight promotes customer status from IT support team directly into the CRM so that the sales team has full transparency. As a result, your sales team will have up-to-the-minute support status right before communicating with the customer. Synchronize your **ServiceNow incidents** with your **Salesforce cases** today with Perspectium SalesInsight.

Get started with SalesInsight for ServiceNow incidents and Salesforce cases

Set up a bidirectional integration to keep your ServiceNow incidents and Salesforce cases in sync.
