

Share or ignore on specified field updates

Fluorine

To [dynamic share](#) your records when only certain fields are updated, you can enable the **Select column updates to share on** option. Alternatively, to ignore (i.e., not dynamic share out) records when only certain fields are updated, you can enable the **Select column updates to ignore** option.

NOTE: To create a before share script to ignore a dynamic share when certain fields are updated, see [ignoring or canceling a share in the before share script](#).

Prerequisites

 First, you will need to [create a dynamic share](#).

Procedure

To share/ignore on certain field/column updates for a dynamic share, follow these steps:

1

Access your dynamic share

Log into your sharing ServiceNow instance and navigate to **Perspectium > Replicator > Dynamic Share**. Then, click into the dynamic share that you want to choose field/column updates to ignore/share on.

2

Check Select column updates to share on/ignore

Click the **Filter and Enrichment** tab. Then, check either the **Select column updates to share on** or **Select column updates to ignore** box.

3

Choose column updates to share on/ignore

Scroll down near the bottom of the form underneath the Related Links. Click the **Updated Columns to Ignore or Share On** tab. Then, click **New**. If using Google Chrome, a popup may appear indicating that you are leaving the form. If this popup appears, click **Leave**.

Choose the column/field whose updates you want to share on/ignore from the **Column Name** dropdown. Finally, click **Submit**.

4

Click Update

Near the bottom left-hand corner of the form (just above **Related Links**), click **Update** to save the changes to your dynamic share.
