

Data Guarantee

Fluorine

Data Guarantee provides enhanced reliability for messages being shared out of ServiceNow (using a [bulk share](#) or [dynamic share](#)) and going to subscribing endpoints. With Data Guarantee, you can easily track functionality for records received and processed by subscribers, determine which messages are errors, and troubleshoot message errors.

Enabling data guarantee

Data Guarantee will be automatically enabled after [creating a dynamic share](#) or [creating a bulk share](#) and setting up a subscriber, such as [another ServiceNow instance](#).
